Biohabitats Achieves Esteemed B Corp™ Certification *Certification signifies leadership in social and environmental responsibility.*

Baltimore, MD—Ecological consulting firm [Biohabitats, Inc.](#) is proud to announce that it is now a Certified B-Corporation®. The nonprofit B Lab® awards this certification to companies that meet rigorous standards of social and environmental performance.

Unlike traditional corporations, Certified B Corporations are required to consider the impact of their decisions on all of their stakeholders, including employees and the environment. The certification places Biohabitats among a vetted group of more than 2,200 corporations in over 50 countries unified by one goal: to redefine success in business.

“We chose to become a B Corporation because we believe in the power of business to catalyze good in the world,” said Biohabitats president Keith Bowers. “With a mission to restore the Earth and inspire ecological stewardship, Biohabitats is a purpose-driven company that measures success primarily by the degree to which we enhance biodiversity, ecological democracy, and the resilience of life on this planet.”

About B Corporations

Certified B Corporations are leaders of a global movement of people using business as a force for good. They meet the highest standards of overall social and environmental performance, transparency, and accountability and aspire to use the power of business to solve social and environmental problems.

About Biohabitats, Inc.

Biohabitats applies the science of ecology to restoring ecosystems, conserving habitat, and regenerating the natural systems that sustain all life on Earth. Through research, planning, engineering, design, and construction, Biohabitats’ interdisciplinary team of ecologists, geomorphologists, biologists, engineers, landscape architects, and planners help communities throughout the world to protect biodiversity, restore ecological function, and strengthen ecological resilience while addressing issues of environmental justice and ecological democracy.
