Biohabitats + Conservation Design Forum, two of the first firms in North America to apply ecology to landscape planning and design back in the 1980s and 90s, have formed an alliance to offer holistic ecological planning, design, and engineering services throughout the Midwestern U.S.

This is good news for communities in the Great Lakes and Upper Mississippi Valley regions seeking to enhance biodiversity, resilience, and ecological democracy.

**Capabilities**

Together, Biohabitats and Conservation Design Forum offer a full array of ecological services, along with in-depth knowledge of the ecosystems of the Midwest:

- ecological restoration
- conservation planning
- regenerative design
- green buildings/sites
- climate change adaptation
- integrated water strategies
- neighborhood/district-scale sustainability
Harness the collective power of two industry leaders.
